

This new freight policy will go into effect on July 1, 2011

Embalming fluid orders of 8+ cases will continue to ship free of charge under our old policy until the effective date.

Effective July 1, 2011

FRIGID FLUID COMPANY

## Freight deduction policy and hazardous materials guide

*This policy is subject to change at any time.*

Frigid Fluid Co. offers a **50% freight deduction** on orders of 8 or more cases (24 bottles/case) of embalming fluid\*\*\*. Embalming fluids that are sold 12 bottles/case count as ½ a case toward the 8 case qualification. Currently the fluids that are sold 12 bottles/case are:

- Humectant
- Plasma Flo
- Free Flo

Any **stocked** sundries (items beginning with 1- or 2-) ordered with 8 or more cases of fluid will also qualify for the freight deduction. Frigid-manufactured equipment and **any** drop shipped items (items beginning with R-) do not qualify.

Embalming fluids and sundries deemed hazardous materials will incur extra D.G. shipping fees (see below). These extra fees **will not** be covered by the freight deduction policy. Only the transportation charges are covered. Currently the products classified as hazardous include:

- STOP - 16 oz. bottle
- Safe Powder - 25 lb. drum
- Paulex Powder - 25 lb. drum (1 lb. jar not applicable)
- Feature Builder - gallon

We can only ship hazardous material via truck (not UPS). As of the date of this document the D.G. charge is \$15.00 per hazardous shipment. Items do not need to be shipped separately. Shipping one item via truck is expensive so if you need to order a hazardous product it is advisable to consolidate it with a fluid order to avoid excessive shipping fees.

\*\*\* *Invoice must be paid within 15 days for freight deduction to be granted.*
